

Bio-Pump (Wall Mount System)

120v or Battery Power

POWDERS

OVERVIEW

Our Bio-Pump drain and odor control system is a programmable peristaltic style liquid dispensing system for our bacteria or enzyme products.

This leading programmable control system is proven for use in drains and plumbing lines including grease traps and other similar on-site waste treatment control systems. Our dispensers are known for their reliability and durability in the field and are backed by a two year warranty.

The 110 volt dispenser is the best-known dispensing unit in the industry for grease trap maintenance or treatment. The battery unit uses two alkaline lantern batteries to dispense where outlets are not available or wash down prohibits 110 volt power.

Common Applications: Grease trap and drain maintenance for almost any location and odor control for trash chutes and dumpsters. Also: Lift stations, waste processing, water treatment and other applications where daily product injection is required.

USES & APPLICATIONS:

- Drain Lines
- Grease Traps
- Lift Stations
- Drains
- Dumpsters
- Waste Processing
- Aerobic Treatment
- Trash Chutes
