

This product is a breakthrough in portable toilet waste and odor control. This high performance product uses nature's own waste digestion process to aggressively destroy odors instead of hiding them behind fancy perfumes. Fast acting enzymes attack waste and its by-products at the molecular level. Millions of potent waste digesting bacteria work continuously to reduce solid accumulation and destroy odors at their source.

This unique synergistic action liquifies solid wastes to keep portable toilets and holding tanks in RV/marine, public transportation, and aircraft pleasant even during periods of heavy use. Most importantly, this product actually gets stronger as the temperature rises. Bacterial strains double every 30 minutes at 70°F to work even harder to provide extra protection from unpleasant odors.

Far safer and more effective than formaldehyde and other harsh preservatives, this product is 100% biodegradable. Treated waste can be processed in conventional waste treatment facilities without special handling. A pleasant, fragrance and a built-in dye aid in keeping each use delightful.

DIRECTIONS FOR USE:
SHAKE OR MIX WELL BEFORE USING.

MARINE AND RV HOLDING TANKS: Pour 8 ounces of this product through toilet into holding tank. Add approximately 1 gallon of water to holding tank. Super concentrated, 8 ounces will treat and deodorize 40 gallons waste weekly additions are optimal.

NO FORMALDEHYDE OR QUATS
CONTAINS 100% NATURAL
BACTERIA AND FREE ENZYMES

PORTABLE TOILETS: Pour 4 ounces into waste holding tank through valve opening. Add enough water to cover the bottom of the tank.

PIT TOILETS: Use this product in place of formaldehyde or disinfectant-containing preservatives. To eliminate odors, reduce solid volume and extend the period between pumping, add one quart per 500 gallons of pit capacity. Make additions weekly.

DOSAGES CAN BE ADJUSTED TO
MEET YOUR REQUIREMENTS

CAUTION

May irritate eyes and skin. Avoid contact with eyes and skin. Use gloves and safety glasses when handling. Wash thoroughly after handling. Do not take internally. If in eyes, flush with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical assistance. If on skin, remove contaminated clothing and laundry before re-use. Wash skin and hands with soap and water. If swallowed, give person several glasses of water and induce vomiting. Contact physician or poison control center for additional instructions.
